	Av.	247	97	14	358

ATTENDANCE OF PUPILS—Continued

		Lower	Middle	Upper	Total
Oakwood	Reg.	404	204	33	641
	Av.	367	184	29	580
Malvern	Reg.	159	65	11	235
	Av.	145	53	10	208
North Toronto	Reg.	117	61	23	201
	Av.	105	50	20	175

Total registered attendance..... 3,416
Total average attendance..... 3,107

The low average attendance is due to the fact that many pupils left school to enlist or to engage in farm service.

New pupils enrolled during the year, distributed as follows:

Jarvis, 185; Parkdale, 184; Harbord, 221; Humberside, 218; Riverdale, 181; Oakwood, 264; Malvern, 92; North Toronto, 78.

Total enrolment of new pupils, 1,423.

Number of pupils who passed Departmental and University Examinations as follows:

Pass Matriculation only	261
Honour Matriculation	74
Entrance to Normal Schools—Lower School	222
Entrance to Normal Schools—Middle School	123
Entrance to Faculties of Education (part 1)	19
Entrance to Faculties of Education (part 2)	20
University Scholarships ranked for	42
University Scholarships awarded	19

Respectfully submitted,

G. A. SMITH,
Senior Principal of High Schools.

Chief Inspector's Annual Report

CHIEF INSPECTOR'S ANNUAL REPORT

To the Board of Education, Toronto:

I have the honour to present the following Report regarding the Public Schools under your charge for the School year ending December 31st, 1917.

ATTENDANCE

The total number of pupils registered during the year was: In the kindergarten, 9,007; in the other classes, 66,028; total, 75,035.

The average daily attendance was: In the kindergarten, 5,334; in the other classes, 46,003; total, 51,337.

The largest enrollment reported at the end of any month in the year was 64,655 for November, and the smallest number 62,024 for January.

The following statement shows the Registered attendance in each School in December, 1917:

	56,778	1273	45	7,492

NOTE—Number of pupils are as reported December 22nd, 1917.

ATTENDANCE IN THE VARIOUS CLASSES

The registered number in attendance in December, 1917, in the different classes was as follows:

Kindergarten	7,492
First Form	19,382
Second Form	14,123
Third Form	14,157
Fourth Form	8,781
Fifth Form	307

The difference in the various classes compared with December, 1916, is as follows:

Kindergarten, decrease	142
First Form, increase	800
Second Form, increase	671
Third Form, increase	1,281
Fourth Form, increase	499
Fifth Form, decrease	108

MEDALS AND CERTIFICATES OF HONOUR

Certificates of Honour and Medals are awarded at the Midsummer closing, to such pupils as have not been once absent or late, and whose conduct has been uniformly good.

Bronze Medals are awarded to such pupils as have conformed to the above conditions for four years.

Silver Medals are awarded to such pupils as have conformed to the above conditions for eight years, or who have passed from the Senior Fourth Book Class in less than eight years, provided they have taken their whole school course in Toronto Public Schools and have received honour certificates during each year of their course.

A Silver Clasp is given to each pupil who conforms to the above for each year over eight years.

The following statement shows the number of Medals and Certificates awarded at the Midsummer closing in the several schools:

REPORT ON SUPERVISED PLAYGROUNDS, 1917

(PRINCIPAL J. A. WOODWARD, SUPERVISOR)

The Supervised School Playgrounds were carried on for the two months, July and August, at seventeen schools, including one at Victoria Street Creche and one at the Joseph Workman School (Orphans' Home). The attendance was splendid and quite regular. In the congested areas of the city, these grounds have been a great boon to the community, as the parents knew that when the children were on these grounds they were safe. The supervisors in charge organized games for the girls and boys, encouraged them to organize games for themselves and exercised a watchful eye over the swings, teeters, slides and sand boxes. Singing games were played on all the grounds, and one Playground had a "Song or Concert" period, during which the children sang patriotic and school songs, recited and told stories. The parents were so interested in this period that they came to the grounds and crowded the fences to hear the children. One of the most popular periods of the day was that of story telling. The children clamoured for stories and still more stories. With the smaller children the "Sand Box" was the favorite. Here they built castles and houses, railroads and railroad stations, rivers and bridges over them, forts and trenches—in fact, everything the imagination could suggest. The swings were most popular and the "slide" always had a long line ready to mount the steps for the slide down. The older boys preferred ball playing, and so a series of inter-playground ball was arranged for both the East and West centres. In the finals, Winchester for the East and Manning for the West played one game, which resulted in a win for Manning in both Senior and Junior.

The largest attendance on any one-half day was 525 at Strathcona School in July. The aggregate attendance for July was 103,305, and for August 56,720. The following is the average attendance for each of the playgrounds:

SCHOOL PLAYGROUND.	JULY. A.M.	JULY. P.M.		AUGUST. A.M.	AUGUST. P.M.
Essex	192	112	....	93	159
Fern	106	114	....	57	62
Jesse Ketchum	108	152	....	61	92
Joseph Workman	69	...	....	74	...
King Edward	171	154	....	93	74
Manning Avenue	209	285	....	200	240
Ogden	154	115	....	76	72
Pyne	119	179	....	69	74
Queen Alexandra	163	158	....	119	89
Riverdale	105	202	....	74	79
Roden	95	111	....	74	58
Sackville Street	93	69	....	75	101
Strathcona	214	206	....	66	72
Western	122	94	....	83	91
Winchester	87	94	....	55	72
York	55	56	....	40	40
Victoria Street Creche	19	...	....	..	...

At six of these playgrounds handicraft classes were organized as follows:

Essex.	Jesse Ketchum.	Queen Alexandra.
Ogden.	York.	Sackville.

Three teachers were engaged in this work, each teacher having charge of two centres, at each of which she taught three mornings per week. The girls were organized into classes as follows:

Junior Class	Girls of 5, 6 and 7 years of age.
Intermediate Class	Girls of 8, 9 and 10 years of age.
Senior Class	Girls of 11, 12, 13 and 14 years of age.

The following is the average attendance at these centres:

Essex	105	Ogden	70	Jesse Ketchum	20
York	26	Queen Alexandra	66	Sackville	58

As a means of improving the playgrounds, making them both efficient and more attractive, the following recommendations are made:

1. In the matter of equipment:
   (a) That a tether tennis pole be erected in each playground.
   (b) That volley ball poles also be installed.
   (c) That the garden swings and the sand boxes be protected by erecting a canopy over them.
2. In the matter of supervisors:
   (a) That only two supervisors be appointed—one for July all day, and one for August all day.
   (b) That three teachers of folk dances be appointed.

Saturdays and Holidays—Games and excursions through the park with Nature Study Talks. Also the usual period for rest in the afternoon.

ANNUAL REPORT OF G. H. ARMSTRONG, M.A., B.PAED.,

INSPECTOR FOR DISTRICT NO. 7

In this Inspectorate there are thirteen schools: Annette Street, Carlton, Fern Ave., Howard, Hughes, Keele Street, Perth Ave., Queen Mary Hospital (Weston), Runnymede, Strathcona, St. Clair Ave., Victoria Industrial (Mimico), and Western Ave. The buildings in which these schools are housed are modern and substantial, with the exception of Perth Ave., Fern Ave. and Keele Street. At each of these schools several classes are in frame "portables," more suitable accommodation is desirable.

There are employed in this Inspectorate 230 teachers of whom 26 are Kindergarten teachers, 2 Manual Training teachers, and 2 Domestic Science teachers. Each holds the qualifications required by the Regulations of the Education Department of Ontario. Five teachers are graduates of Canadian universities, forty hold first-class certificates, and all the rest of the grade teachers hold second-class certificates of qualification.

The first meeting of the Teachers' Institute of District Seven was held in October. It was of two days' duration, in keeping with the requirements of the Department of Education for Ontario. One-half day was given by the teachers of each grade to observation of an experienced teacher at work in the class-room with his or her own class. The remainder of that day was given to appreciation and criticism by the teachers of the management and methods observed. The second day was given up to papers and addresses on methods and educational topics by teachers of the District and educationists of Toronto. Over seventy teachers of the Inspectorate contributed to the programme. There was a full attendance at each session and an intelligent interest manifested by all. New inspirations and aspirations were kindled which have helped to transform the quality of work in many class-rooms.

The teaching in an ordinary class-room still consists to a large extent of giving results rather than the use of the laboratory method of leading each child to discover problems in every department in a concrete way and guiding him to a solution without taking away his independence. Formal and ineffective recitations are smothering rather

than developing native powers and activities. Since the vital factor in any school system is the teacher, Toronto should give attention to the source of its supply. Requiring, as it does, to add 150 teachers to its staff annually, the Board of Education should establish its own Normal Training School with a two years' course which would give some special attention to the educational problems of a great urban centre.

School is still too closely tied to traditional book studies unrelated to life of to-day. Too often to the student the tasks are meaningless words, lists, facts, results for memorization. The vitalizing element of application is lacking. He is not trained in raising situations in real life, and in discovering that behind the words are possible and practical realizations. This problem of the application and generalization of school experience is the problem of education. The exigencies of the food situation created by the war have forced this revolution in the field of Nature Study. It has shifted from the culture of an attitude towards, and an aesthetic understanding and appreciation of principles in the abstract, to the cultivation of vegetables and fruits in vacant lots, and home gardens. Lessons in nature have become charged with living interest and at once applied to ennobling and profitable industry.

Vocational guidance is one of the most significant and far-reaching movements in the field of education of to-day. It is suggested that a special course in this department be instituted for senior teachers and principals. Not only great individual advantages would accrue to our youth from expert guidance but the nation's greatest asset would become many times more effective. The most illuminating text-book, in many respects, that has appeared on this subject, is John M. Brewer's "Vocational Guidance Movement."

Since there is nothing in the nation that is not first in the school, it is recommended that consideration be given to fostering directly intelligent patriotism among school pupils and teachers by a series of lectures to the teachers by some of our efficient leaders in all departments of education and industry, re British ideas, ideals, and institutions. These illuminating messages would be reflected in the mental attitude of the teachers towards the socialogical and political problems arising in the studies of the school and have a telling effect upon the formation of the national and constructive point of view of our youth.

It is recommended that the curriculum of Form IV, be enriched by giving the students the privilege of studying another modern language daily from 3.30 to 4 p.m. Very many of the 90 per cent. who do not attend any higher educational institution than the public school, enter upon a business career. One need not enlarge upon the utilitarian and desirable educational values that are athwart the path of the youth of to-morrow who have a working knowledge of French or Spanish or both, taught according to modern direct methods. It may be urged that our course is already overcrowded. This is only apparently true. By eliminating much useless matter now droned over in each subject and transforming the lesson periods by concrete and socialized instruction, this advantage could be given to all who might seek it at no additional expense to the Board of Education.

The new schedule of salaries for teachers adopted by the Board is an appreciative one for which it deserves the gratitude of all friends of the best interests of education. No provision seems to be made to mark approval of superior work. A material incentive such as is provided by the schedule adopted by the Ottawa Board of Education on November 1st, 1917, would be an inspiration to many to seek higher attainments and greater efficiency. The clause to which I refer is found on page 25 of the Inspector's Annual Report, 1917, on the Ottawa Public Schools. It reads as follows:

"The Inspectors may recommend to the Management Committee at its November meeting in each year that any teachers who have not reached the maximum salary for their class be moved forward on the salary schedule two or more years instead of one year. Such recommendations shall be made only in the case of teachers whose class-room work is so much above the average as to entitle them to some special consideration."

ANNUAL REPORT OF W. H. ELLIOTT, B.A.,

INSPECTOR FOR DISTRICT NO. 4.

ACCOMMODATION.

The buildings, with the exception of the old part of Ryerson, are all in excellent condition and the class-rooms are well heated and lighted.

There has been a marked improvement both in the quantity and quality of the lavatory accommodations. The old type of urinals and closets are gradually being replaced by the more modern and much more sanitary form. This latter improvement adds much to the comfort and health of the pupils.

The Building Department of the Board is to be congratulated on both the amount of repairs and the quality of the interior decorations done during the holidays.

The school grounds, in some cases, are quite inadequate to the number of pupils. This is especially true in Ogden and Ryerson, our largest schools, where enlargement of the lots would be almost prohibitive from the financial standpoint. In the newer schools, this defect is being remedied through a wise provision of the Board in securing large areas in outlying districts.

EQUIPMENT.

The equipment of the schools has been materially increased since my last report. There still remains much to be done in the matter of maps and charts. Some of the largest schools are much handicapped through this shortage.

Large sums of money are being spent annually in supplying supplementary reading matter for the various forms. The First, Third and Fourth Forms are, with few exceptions, well equipped in this respect and I am hoping that the Second Form will be supplied during 1918.

PRIMARY WORK.

I am much pleased with the teaching in the Primary Grades. The almost exclusive use of the Phonic method of teaching reading has been abandoned and teachers are using any method that enables the child quickly to recognize words

and phrases and sentences as the expression of thought. Much attention is given to phrasing and a nicety of expression is obtained which would do credit to pupils of the higher grades. The increased supply of supplementary reading has materially aided in this respect.

While the time usually required for pupils in the Junior I Grade was at least one year, and in very many cases one and a half years, I find that in the majority of the schools of my district, the work is now completed in five months by 40 per cent. of the pupils. This, under the improved methods, represents a distinct saving to the pupil and the state.

I feel bound also to state that this 40 per cent. would be materially increased if the subject of Formal Arithmetic were deferred till the Junior II Grade was reached. It is true that Primary pupils in short time attain a remarkable deftness in the handling of number symbols, but I am convinced this attainment is at too great a cost of the child energy. Were the time—one-fifth of each school day—now spent in the "number grind" devoted to reading, oral composition, manual work and play, while not excluding the incidental teaching of number, much better results would be obtained.

The recent decision of the Board of Education to substitute moveable tables for the ordinary desk, is a movement in the right direction and will give greater facilities for manual occupations and games, and thus insure to the child the continuance of an atmosphere in accord with his instincts.

Apparatus for Senior Forms.

Again I feel it my duty to call attention to the absence from our school rooms of Simple Apparatus, the use of which would enable Senior pupils to understand the fundamental principles underlying physical phenomena. In only one Fourth Form room in this district is such apparatus to be found and this has been supplied at the expense of the teacher. The keen interest aroused through its use, the spirit of enquiry displayed, as well as the attainment of concrete knowledge in the pupils, shows the inestimable value of this as an aid in teaching. I am confident that the results obtained from the use of such apparatus would amply repay a little expenditure by the Board in its purchase for our Fourth Forms.

NATURE STUDY.

This department of work seems to be one of the most difficult on our programme, especially for schools in the heart of our great city. While I find here and there some excellent teaching and systematic direction of observations, yet on the whole this subject, if such it may be called, is poorly conducted. This is due mainly to two causes—1st a lack of knowledge through personal observation on the part of the teachers and 2nd as an inevitable outcome of this, the common resort to the "informing" method.

Observant teachers generally make for observant pupils and even amidst the dust and smoke of our down-town districts, such teachers will find many a nature topic that will interest and inspire a class.

The manual on Nature Study, lately issued by the Department of Education, will be an invaluable aid to teachers of this subject, both as to content and method.

COMPOSITION.

The teaching in this important subject is fairly satisfactory and a marked improvement is taking place through the more general use of the Oral method throughout the grades. Much more attention is also given to the organization of the pupils' thoughts on a topic, thereby improving the form and clarifying the content. I find much work, both oral and written, among out senior classes that is remarkably good.

MANUAL TRAINING.

While satisfactory provision has been made for our Fourth Form pupils in this department, very little is done for our intermediate grades. Paper cutting and folding is well conducted in the Second Forms, but owing to the absence of materials, such as cardboard, clay and thin wood, the Third Form pupils have little or no work of a manual nature. A movement, however, is already begun to supply this material as well as desk covers, so that in the near future I hope to see this feature of our work continued without a break from the Kindergarten throughout the grades.

Teachers' Institutes.

The recent change in the regulations governing Teachers' Institutes is certainly in the right direction and will place the teachers of Toronto in a position to carry on their convention work with much greater profit. Heretofore our meetings, whether in grades or as a whole body, were unwieldy on account of numbers and as a result very few took part in discussion.

This year we met for the first time as separate Institutes, the forenoons of each day being devoted to separate grade meetings; the afternoons to general meetings of the teachers of the district. The topics of the various programmes, for the most part, dealt with actual class-room work and proved of vital interest to all. Since the Institute met I have heard many teachers express their appreciation of the change and of the direct helpfulness to them of the discussion, in small groups, of the grade work.

I feel that the new regulations of the department have been fully justified in the results accruing to the teachers from this, its first trial and I believe that future meetings will bring still greater benefits as the Institutes improve in organization.

Patriotism and the War.

I should be lacking in appreciation were I to omit mention of the splendid patriotic work that has been carried on continuously by pupils and teachers since the beginning of the war. The personal givings have amounted to scores of thousands of dollars for the whole city. In many cases these gifts have meant real sacrifice, but they were cheerfully given to the great common cause. In addition to gifts of money, teachers and pupils have sent regularly to the troops overseas great quantities of socks, boxes of food and comforts of various kinds. Along with this practical work has gone a careful study of the war. Indeed it is refreshing to see the grasp which even Senior III pupils have of its fundamental causes, and the interest with which they follow its daily progress.

ANNUAL REPORT OF D. D. MOSHIER, B.A., B.PAED.,

INSPECTOR FOR DISTRICT NO. 3.

The number of schools remains at 26 as in my last report but the number of rooms has increased from 189 to 192, and the total number of teachers from 208 to 213.

KINDERGARTENS.

There were 22 Kindergarten classes in 19 schools with a registered attendance at the end of the year of 1,044, an average of 47 per class. Very few children are admitted before the age of five years and the average age of those in attendance a month after promotions are made is about $5\frac{3}{4}$ years. The character of the work varies from fair to a degree of excellence which is probably as high as any other claiming or reported to be the best in Canada or on the Continent. In one of the best class of Kindergartens there has been for some years an excellent example of the good which can be accomplished through the active co-operation of the home and the school. I refer to the highly commendable work of the Rosedale Art League in making the Kindergarten room of the Rosedale School beautiful. The splendid work of this League is an example of what might be done by ideal home and school clubs in other districts.

JUNIOR FIRST GRDAE.

In December, 1,324 children were reported in the 31 classes of the Junior First Grade; an average of 43 per teacher. I am informed that the time was in Toronto when the primary teachers had 50, 60 and even 70 children in their classes. "And they did good work, too, with the large classes," said a gentleman to me one day. "As good as it was possible for them to do I have no doubt," was my reply. That the decrease in the size of Primary classes has been justified by the improvement in results can, I believe, be well established. Some of the Primary teachers are preparing pupils of excellent or good mentality to make a satisfactory promotion to the Senior First, or Grade 2, in one-half of the school year, that is in five months. These results are found under conditions so different as to lead me to conclude that they are due to the efficiency of the teachers and

not to the advantages of good environment or heredity. Some do not even believe that the results herein stated can be obtained and have asked me if I believed the statements they had heard made in support of them. One day I repeated the doubter's query to a teacher of rich experience who I saw was "putting up the goods," and doing it in the quiet, restful spirit of true mastery. "Why," was her reply, "that has been my average time for some years."

The greatest factor in the production of such efficiency is adequate training. It counts for more than talent or exclusive methodology. Some use the Phonic method only, some use it in combination with the Word or Sentence methods; but in every case those who secure these results are free from fads or the bondage of devices, loyal to the fundamental principles of mental development, possess good initiative, strive wisely for mastery and are highly trained.

The following example of a definite case will serve as an illustration of results. A class of 41 children with the handicap in most of their homes of foreign environment, of whom only two were more than six years old, was formed from an overcrowded Kindergarten in September, 1916. In June, 1917, 13 were ready for promotion to the Junior II, or Grade 3; 22 were continuing the work of Senior I, or Grade 2; 4 very slow children were still in the Junior I or Grade 1 and 2 had been transferred to another school. The teacher had had the advantage of Model and Normal training followed by experience of some years as critic teacher in a Model School.

SENIOR FORM I AND FORM II.

In the Senior Grade of the First Form there were 22 classes with an aggregate attendance of 1,014, an average of 46 per class. In the Second Form there were 39 classes with an aggregate attendance of 1,719, an average of 44 per teacher.

The importance of the work in these grades has often been underestimated. When the principal must tolerate weakness on the school staff it has often been considered less injurious in one of these grades than in any other position. Here, also, are found the young teachers who are unwilling to risk being considered successful in classes above or below these and likewise those whose years of experience entitle them to employment where the strain is least. In

spite of these influences which are not absent in this Inspectorate any more than in others a fair percentage of the teachers of these grades are forceful, splendidly efficient in the development of character, producers of individuality, inspiring to their pupils, unsparing of effort, a blessing to the children in their charge. A higher percentage of ef- the children in their charge. A higher percentage of efficiency in these grades could be secured if all new teachers were required to prove their worth in other classes before being assigned permanently to one of these.

FORMS III AND IV. (GRADES 5, 6, 7 AND 8).

In Form III, Juniors, the 25 teachers had an average of 40 pupils; in the Senior III the average was 41 pupils for each of the 21 teachers.

In Form IV, Juniors, the 8 teachers averaged 40 pupils each; in the 14 Senior IV classes the average per class was 41.

Few teachers lacking confidence in their ability to do satisfactory work in any class enter these grades if they can secure easier positions. The result is a high average efficiency in the work of the teachers in Forms III and IV. Here more than anywhere else in the whole school course the child's power to think demands teachers who can satisfy, increase and direct its activities, create ideals for the making of manly men or womanly women and through strong leadership make worthy leaders for the coming time. It is no task for weakness; in fact, it is no one's task. To him or to her who is best fitted for it no thought of task performance ever comes. Such teachers one finds in every Form; everywhere there is room for them and need of them, but chiefly are they needed at the beginning and at the end of the Public School Course.

OTHER CLASSES.

In this Inspectorate the Board of Education maintains several schools in charitable or philanthropic institutions having charge of children of school age. Of these the Lee and Allan Schools are of the regular city type of three teachers each. At the Shelter under the Children's Aid Society an ungraded school is taught by one teacher. A similar class is also maintained at the Preventorium. At the Sick

Children's Hospital a teacher gives instruction from cot to cot to convalescent patients. In the Home for Incurable Children on Bloor Street a small class of children is taught in two groups,—(a), the girls; (b), the boys. Here the aim of the teacher is to bring pleasure and encouragment through instruction to children who have many causes for despondency. All this work is highly praiseworthy and reflects creditably on the policy of the Board.

NIGHT SCHOOLS AND SPECIAL CLASSES.

Three Night Schools were opened during the current Night School period. At the Working Boys' Home there were two classes; at the Hester How School, four classes; at the Industrial Refuge, one class. The Hester How School is attended mostly by foreigners. In all classes good interest was shown in the work.

In the Orde Street School there are two special classes or what has been called Fresh Air Classes. These rooms are for children from any part of the city whose health needs more favourable conditions than are found in the ordinary class room. Both rooms are supplied with fresh air directly through open windows. One room is heated, the other is not.

All the advantage they have from fresh air could be obtained in every school in the city and probably at less than the cost of the systems of ventilation now in use. In this connection the school room at the Preventorium may well be considered. It, too, is ventilated by means of open windows. The temperature is kept at 60 degrees or lower. The results as reported to me are excellent. The pupils suffer less from colds than children do in other schools, they gain in weight and enjoy a general improvement in health while in attendance. Surely there is something to be learned from these conditions and results. What is good for the weak should be good for the strong.

ANNUAL REPORT OF JOSEPH WHYTE ROGERS, M.A.

INSPECTOR FOR DISTRICT NO. 6.

I am glad to be able to report decided advances in many (if not in all) lines within the limits of our prescribed domain.

The schools under my supervision are as follows:—

Alexander Muir	School	—18 rooms	20	teachers
Brock Avenue	"	—17 "	19	"
Dovercourt	"	—21 "	24	"
Earlscourt	"	—20 "	23	"
Kent	"	—31 "	35	""
Parkdale	"	—17 "	20	"
Pauline Avenue	"	—17 ""	20	"
Pyne	"	—6 "	6	"
Queen Victoria	"	—17 "	21	"
Regal Road	"	—24 "	27	"
Shirley Street	"	—14 "	16	"

Of these rooms 4 are portables—2 at Parkdale and 2 at Earlscourt, or rather on the new Glenholme Ave. site. The total number of teachers including Kindergartens, Manual Training and Domestic Science Demonstrators is 231.

The teachers of this Inspectorate include ladies and gentlemen of most excellent personal qualities and high professional attainments. They are most assiduous in their application to duty and with but few exceptions have attained a high degree of efficiency. On the whole they form a staff of whom an inspector may justly feel proud.

DISCIPLINE.

During the first two years of the war great strides were made in the discipline of the schools. This was due, in large measure, to the awful conditions incident to the war and the apparent necessity for co-operation on the part of children as well as of adults, The minds and hearts of the children were plastic in their anxiety to be of service to their fellows. The efforts to send relief to the distressed everywhere constituted a sufficient inducement to cause even the most wayward to assume an attitude of readiness to respond to whatever demand might be made upon them. The discipline of the army extending as it did into the homes of the masses produced a corresponding attitude in the children of the homes and the results were noticeable in the schools.

After the large drafts upon our training camps in the summer of 1916 many homes were left without the governing influence of the father. In consequence the activities of the growing youth were left to the influence of the mother, and the educational authorities. Notwithstanding, the relaxation has not extended even to former conditions. On the whole the state of discipline in the schools is quite satisfactory. It is a fact, however, that a great deal of the indefiniteness of the thinking operations of school children is due to a certain laxity in the general discipline of the schools.

MANUAL TRAINING.

There are two centres of Manual Training in the Inspectorate—Parkdale and Kent Schools. There ought to be a third, but the lack of building accommodation at Earlscourt renders the introduction of it very difficult. There is room at Regal Road School, but there are disadvantages in connection with Regal Road which render it inadvisable to introduce it there. The work of the instructors is satisfactory, but it would seem, that Third Book classes, where there are boys, 13 years old, who because of their retardation purpose leaving school at the earliest legal date, ought to be provided with some woodwork before leaving school. Besides such work might arouse them to a realization of the necessity of study and diligence in the performance of duty. Manual work does reveal to boys in a measure their own powers and limitations hence, is a valuable factor in determining one's choice of occupation. I would recommend the introduction of the handling of tools into the Third Book classes.

HOUSEHOLD SCIENCE.

As in the case of Manual Training there are two centres of Household Science in the Inspectorate—Parkdale and Kent Schools. The remarks made in reference to Manual Training apply equally here. Girls leaving school before the Public School course is completed need instruction in Household Science perhaps more than those who may never be in a position to require it. It is a matter for congratulation that in the last decade or more a great improvement has been made in the instruction of girls and young women in this most important department of human activities. The Domestic Science instructors deserve all credit for their splendid work.

ORAL COMPOSITION AND PUBLIC SPEAKING.

Efforts are being made to stimulate the art of public speaking and debate by means of oral composition. Very satisfactory results are being obtained by the teachers in an effort to promote an interest in the power of communicating thought. The mode of asking questions and receiving answers is now receiving more attention in order to lessen the wastage of effort in teaching. Often children do not answer questions because they do not understand them. They do not understand because they do not hear. They do not hear because they do not listen. They do not listen because they are not interested. This interest can be aroused by the live teacher who understands both child and child development. The child must put into language all thought worth expressing. Hence the necessity for language development.

THE NEW TEACHERS' INSTITUTE.

A year ago the old Toronto Teachers' Institute was broken up into seven separate Insitutes each having an executive and distinct organization of its own. This fall the teachers met as an Inspectoral Institute on the 8th and 9th days of November, in the Kent School. On the first day they met in Forms and discussed papers prepared by themselves having direct reference to the subjects of the class-rooms and the scientific and practical methods of their introduction. On the second day they met as one whole and discussed subjects that had a more general application to all the Forms. So well did the teachers acquit themselves in the presentation of their subjects that their fellow-teachers were most hearty in their words of appreciation. The Education Department is to be congratulated on the success of the new plan.

IN MEMORIAM

The following teachers died during the year 1917 ;

Mr. J. Galbraith, of Ryerson School, died Jan. 7th, 1917.
Mr. A. W. Archibald, of Dufferin School, died Apr. 4th, 1917.
Miss S. Evans, of Jesse Ketchum School, died Apr. 1st, 1917.
Miss S. Constantine, of Western Ave., School, died June 1st, 1917
Mr. W. P. Buchanan, of Carlton School, was killed in action, June 10th, 1917.
Mr. W. E. Groves, of Ryerson School, died June 25th, 1917.
Miss R. H. Doolittle, of Leslie St. School, died July 27th, 1917.
Miss S. F. S. Byrch, of Sackville St. School, died Oct. 27th, 1917.
Miss A. E. Anderson, of Parkdale School, died Dec. 13th, 1917.

GENERAL PROGRESS.

Owing to the last date of publication of the Annual Report of the Board of Education for the year 1916, the Chief Inspector's section of that report included a reference to the conditions of the entire school year ending June 30th, 1917, and also a statistical report of the re-organization at the beginning of the new school year in September, 1917.

As the Board of Education has expressed the desire (January, 1918), that all heads of departments should have their annual reports for 1917 ready for the printer at an early date, the statistics and general survey of the school year ending June 30th, 1918, will not appear till the Board's report for the calendar year 1918 is issued.

The reports made by the Inspectors during 1917 on the condition and progress of each school, as also the general statistical reports for the last school year, afford evidence of some growth and a continued high standard of endeavour on the part of the teaching staff, in the face of those trying conditions, spiritual and material, in which the schools have amply shared during the course of the war.

The statistical facts, all in all, are much the same as those for other large cities and, on the whole, stand well above the average in the general character of the conditions they illustrate. At the same time, if educational efficiency may be judged from statistical facts, it is not apparent that the public schools of the more populous centres possess an all round educational advantage over those of the smaller places. While it may be contended that the statistics of a system of schools are not a true index of the quality of its work, it remains indisputable that many of the conditions that may be accurately represented by statistics distinctly indicate or affect the state of progress or the quality of school work. Such are regularity of attendance, dropping out, numbers promoted, proportion of pupils in each form, retardation, etc.

The statistics of all urban school systems show too large a proportion of the pupils in the lowest grades of the public schools, a condition not to be explained by the fact that the compulsory attendance law does not apply in the case of children under 8 years or over 14 years of age. As for Ontario, the following table shows that this unsatisfactory condition is more marked in some of the larger cities than in

some of the smaller cities of the province, and that there is much room for improvement in the case of Toronto. The figures of this table are based on statistics for the year 1916, being the latest obtainable from the last annual report of the Minister of Education.

STATEMENT OF AVERAGE NUMBER OF PUPILS IN THE DIFFERENT FORMS IN THE CITIES OF ONTARIO ACCORDING TO REPORT OF THE MINISTER OF EDUCATION FOR 1917.

(a) Where there is a Kindergarten Department:

SCHOOL	Kindergarten Primary and Sr. 1	Second Form	Third Form	Fourth Form
Brantford	51.35%	16.8 %	20.66%	11.19%
Chatham	45.16	16.03	23.67	15.14
Fort William	51.85	14.80	18.16	15.19
Galt	39.01	24.09	18.93	17.97
Guelph	42.62	16.72	23.18	17.48
Hamilton	42.19	25.5	19.41	12.9
Kingston	46.35	12.27	21.74	19.64
London	36.63	22.91	21.14	19.32
Ottawa	40.06	21.43	18.63	19.88
Peterborough	48.62	18.78	15.55	17.05
Port Arthur	44.41	25.47	16.10	14.02
St. Catharines	44.58	14.67	21.22	19.53
St. Thomas	44.65	18.96	21.88	14.51
Sault Ste. Marie	45.83	17.81	20.16	16.20
Stratford	40.37	15.93	22.97	20.73
Toronto	42.41	20.73	20.2	16.66

(b) Where there is no Kindergarten Department:

SCHOOL	Kindergarten Primary and Sr. 1	Second Form	Third Form	Fourth Form
Belleville	41.30%	21.50%	18.40%	18.80%
Niagara Falls	44.39	16.67	22.49	16.45
Sarnia	39.85	21.1	21.72	17.33
Windsor	52.48	19.82	15.56	12.14
Woodstock	44.51	15.1	19.87	20.52

COST OF MAINTENANCE.

The total cost of maintenance of the Public Schools for the calendar year, 1917, as reported by the accountant was $2,243,333.52. This includes, in addition to the regular day school courses, the cost of all the auxiliary interests and activities of the Public Schools, such as night schools, vacation schools, forest schools, supervised playgrounds and accompanying courses in constructive work during summer vacation, open air classes, cadet corps, inspection and supervision, departmental examinations, superannuation and a portion of the cost of Medical Inspection.

Charging to the regular day schools the total cost of maintenance as given above, the cost of one full school year of Public School education for one pupil in 1917 was $43.69. After deducting the amount of the annual Government Grants and other receipts, the net direct cost to the Public School supporters of Toronto would stand at $41.64 per pupil per year.

Estimated on the basis of total cost of maintenance of the city public schools, the results for the past five years, are as follows:

Total cost per pupil for the calendar year 1913.....	$43.76
" " " " " " 1914.....	43.59
" " " " " " 1915.....	43.45
" " " " " " 1916.....	45.25
" " " " " " 1917.....	43.69

The term "Cost of Maintenance," as used technically in the provincial school law, does not include charges on account of cost or use of school buildings, school sites, etc., and following the practice pursued by most boards, the Board of Education for the City of Toronto has never included in the annual cost of Public School education any sum for use of school property or in liquidation of cost of school buildings, though inevitably these must be replaced every three or four decades.

The Public School properties at present in use are valued at about fifteen million dollars or about three hundred dollars for each unit of daily average attendance of fifty thousand pupils. Assuming that ultimately the increase in value of sites will offset the depreciation in value of buildings, an addition of fifteen dollars per pupil should be added to the cost of maintenance given above, if an allowance be

made of interest at the rate of five per cent. on the fifteen million dollars invested in school property. On such a basis the present annual cost of maintenance per unit of average attendance should therefore be placed at about $59.00.

ADMISSION TO HIGH SCHOOLS.

For the past four years pupils from the public schools have been admitted to the high schools on the recommednations of their principals. On the whole this change has worked most successfully and has been regarded with general public approval. Since the inception of this mode of admission in 1914, over six thousand pupils of the public schools have been awarded High School Entrance Certificates without being required to write on the Entrance Examination.

During each year a considerable number of pupils who were not recommended by their Principals exercised their right to present themselves for examination, and from 25 to 50 per cent. of these candidates were successful. From such results it would appear that in a number of schools the principals have given their recommendations too sparingly.

In the case of a few schools in particular each year a rather large number of pupils were refused the recommendations of their principals when subsequent results indicated that they were fairly entitled to such recommendations. In 1915, for instance, 290 candidates from 46 schools, who were not recommended for certificates, passed the examination, and 146 of these came from 8 of the schools. Again in 1916 the non-recommended candidates who passed the examination, 197 in number, came from 44 schools, while 102 of them belonged to only 5 schools. Similarly last year (1917) while 202 candidates from 44 schools were successful at the examination, 101 of these successful candidates belonged to 7 schools.

While many hold that the test should cover fewer subjects, the standard exacted for the High School Entrance Examination in Ontario is widely accepted as a good criterion of the candidate's ability to proceed with a secondary education.

Two main objections are taken to existing conditions governing admission of pupils to our high schools. One is to the effect that an examination given by an outside body

cannot be a fair and adequate test of the work and attainments of the pupils of any school in particular, and that under such a system of measuring results some of the best qualities of teaching cannot be nurtured. The other objection is that the application of such an inelastic standard results in denying, in many cases, all opportunity for secondary education to pupils who definitely fall short in some part of the test for admission, though such pupils may be quite capable of proceeding far in other branches of learning and investigation.

The very development of knowledge and outlook to which the high schools have so well contributed appears to have brought us to the stage where the need is becoming insistent for a greater variety of courses and the opportunities consequently more suitable for those pupils from the upper grades of the public schools who are capable of pursuing successfully some if not all the branches of the traditional courses.

The logic of the situation appears to incline in this direction. If an arbitrary standard of promotion were required at each stage in the Public Schools, many pupils who ultimately give a fair account of themselves would fall by the way and would be arbitrarily exlcuded from the spare benefits of an elementary education in all subjects beyond the standards of the Second Form. The public is beginning to ask for similar elasticity in respect to promotions to and in the high schools. While such elasticity might result in lowering the all round average of attainments among high school pupils, if it encouraged many to advance it would materially increase the sum total of knowledge acquired. This is one of the things the people need and are beginning to want—a wider dissemination of secondary education and the power derived from it. How to afford this opportunity without impairing the standard of thoroughness desirable for, and at present reached by, many of the capable high school students is a problem which appears to be on the road to solution in some places.

In the meantime, the objection to a uniform High School Entrance Examination conducted by an outside body is overcome by those provisions of the regulations under which principals of the public schools may recommend pupils for admission without taking such examination.

But clearly it is not the intention of this regulation to

abolish a definite capacity test in the form of a written examination. The aim is to afford Public Schools an opportunity to substitute for an examination by an outside body an examination by the persons who prepare the pupils. To an examination of this nature conducted under reasonable conditions and in proper relation to the records of the pupils throughout the year, little objection can be taken. Where principals use this alternative provision with wise discrimination year after year the number of non-recommended pupils who insist on writing at the regular High School Entrance Examination will gradually diminish for the simple reason that success under such circumstances will be rare and accidental.

NUMBER ENTERING THE HIGH SCHOOLS.

The following table shows (a) the number of pupils belonging in June, 1917, to the Senior Grades of the Fourth Forms, i.e., the classes in which pupils are prepared for the High School Entrance Examination; (b) the number who passed the examination; (c) the number who subsequently entered a high school; and (d) the distribution of the entrants among the high schools.

The total roll of pupils in June, 1917, was 61,892. Allowing 8 years as the average Public School period of a pupil, it would appear that, on the present basis, about 25 per cent. of those who attend the Public Schools will pass the High School Entrance tests and that about 18 per cent. of the pupils will attend high school.

In other words, it would appear that in the average Toronto Public School containing 800 pupils, there are 656 pupils who will not enter a high school.

THE KINDERGARTEN AND PROMOTION PRGORESS.

The following tabulated statement is compiled from the progress records of 2,077 pupils who, dur ng the past five years, 1913 to 1917, passed the High School Entrance Examination after attending in each case one school without change throughout their entire Public School course. Of these pupils 1,233 entered school in the Kindergarten and 844 entered in the Primary Grade (Junior Form I).

TIME FROM KINDERGARTEN TO HIGH SCHOOL ENTRANCE.

No. of Pupils	Average Age Entering School	Average Time in Course	Average Age on Passing H. S. Entrance
742	5 yrs. 5 mos.	8 yrs. 9 mos.	14 yrs. 2 mos.
377	6 yrs. 5 mos.	8 yrs.	14 yrs. 5 mos.
91	7 yrs. 4 mos.	7 yrs. 9 mo.	15 yrs. 1 mo.
23	8 yrs. 3 mos.	6 yrs. 8 mos.	14 yrs. 11 mos.

TIME FROM PRIMARY GRADE TO HIGH SCHOOL ENTRANCE.

No. of Pupils	Average Age Entering School	Average Time in Course	Average Age on Passing H. S. Entrance
150	5 yrs. 6 mos.	8 yrs. 6 mos.	14 yrs.
330	6 yrs. 6 mos.	7 yrs. 8 mos.	14 yrs. 2 mos.
265	7 yrs. 5 mos.	7 yrs. 1 mo.	14 yrs. 6 mos.
99	8 yrs. 4 mos.	6 yrs. 8 mos.	15 yrs.

As it is commonly considered that the progress of pupils is retarded by frequent changes of school, the present inquiry has been confined to the cases of pupils who have not changed their schools. The results now presented may be regarded as throwing some light on such questions as the projected value of the Kindergarten, the best age at which to commence school and the suitability of the prescribed course of school work. While absolute conclusions cannot be drawn from such limited data, the tendency is to indicate that after receiving a course in the Kindergarten the average pupil passes through the subsequent grades of the school in a period shorter by several months than that taken by a pupil of the same age who enters the Primary Class. On the other hand it might be pointed out that the 742 pupils who entered Kindergarten at age of five and a half years

passed the High School Entrance Examination at only the same age as the 330 pupils who remained out of school a year longer and then entered Primary Class at the age of six and a half years. This seems to indicate that attendance of a pupil five years of age at Kindergarten gives the pupil no advantage over remaining at home till six years of age, at least in respect to progress in subsequent public school work. Should this be confirmed by very extensive examination of cases, it might still be contended that if the subsequent Public School course were constituted more in harmony with the educational ideals of the Kindergarten, the advantage of the latter would be much more apparent in the subsequent progress of the pupil.

The 91 pupils who entered Kindergarten at average age of 7 years and 4 months did not pass the Entrance Examination any younger than the 99 pupils who remained at home a year longer and then entered Form I at the age of 8 years and 4 months. Also the pupils who entered school at 5 years of age completed the Public School course only 1 year younger than those who entered at 8 years of age. If a sufficiently extensive inquiry should continue to show similar results it might be inferred that either the Public School course, Kindergarten included, is, after all, not so well adapted for young pupils, or that young pupils are about as well off at home as they would be in school, at least in so far as educational advantage may be measured in terms of school progress.

It is interesting to note that the eight year old pupils who entered Kindergarten reached Entrance standing at the same age as the eight year olds who entered Primary Class. While such examples as these are not numerically so extensive as to warrant definite inferences, they serve to suggest some of the lines along which statistical investigations may throw valuable light on current school problems.

AGE AND TEACHING ABILITY.

The 1,603 teachers on the Public School staff at the end of the year may be grouped according to age in decades as follows:

73 men and 575 women in the twenties.
45 men and 411 women in the thirties.
41 men and 277 women in the forties.
21 men and 147 women in the fifties.
6 men and 7 women in the sixties.

The average age of the 186 men is 35 years and the average age of the 1,417 women is 33 years.

For some years the appointment of teachers to the Public School staff has been regulated by by-laws which provide, among other things, that no female teacher over 30 years of age and no male teacher over 35 years of age shall be eligible for appointment. Conditions of supply and demand may have been the ground on which different age limits were set in the case of men and women. Or it may have been considered that the period of maximum efficiency as teachers is about five years shorter or terminates five years earlier in the case of women. On several occasions in connection with the engagement of teachers under certain conditions arising since the beginning of the war, members of the Board of Education have raised questions as to the reason for this discrimination in the age limits and also as to to the reason for fixing the age limits at 30 or 35 years at all. No satisfactory answer to these questions was available. Questions of this character cannot be disposed of satisfactorily even by the opinions of experienced educators. Definite records of a large number of concrete cases are the safest basis on which to determine how and where age limits for appointing and retiring teachers should be fixed if there are to be such general limitations.

In the hope of throwing some light on this subject, the inspector's grading of members of the staff in teaching ability is being summarized according to age periods. An examination already made of the grading of about 400 teachers seems to indicate a slight general rising in quality of teaching from the twenties to the forties, and then a slightly lower standard of teachers in the fifties but still somewhat above that of teachers in the twenties. From such a limited examination general conclusions cannot be safely drawn. A large number of examples taken for a considerable period are essential to offset probable variations. The questions raised by such an inquiry are admittedly of practical importance. The comparatively large number of teachers employed in the Public Schools of Toronto affords a fair opportunity for reaching reliable conclusions through continued inquiry.

HOME GARDEN PLOTS.

During the summer of 1917 a much larger number of pupils than usual cultivated home garden plots. No little

stimulus was given to this movement by the illustrated talks on garden plots given by Dr. S. B. Sinclair in many of the Public Schools during the preceding winter. The movement has also been encouraged materially by the active co-operation of the principals and their staffs.

Also special certificates to the number of 5,149 were awarded by the Board of Education to all pupils who aided in the production of farm or garden produce during their summer holidays. The standard of award was graded mainly according to the ages of the pupils on the basis of recognizing proportionate effort, exceptional physical development being also taken into account. It is expected that a much larger number of pupils will win certificates during the next summer vacation. Variations in the number of certificates awarded in the schools is partly due to size and location of schools and number of pupils away from home during vacation.

THE FISHER BILL.

The most notable event in our educational world in the past year was the introduction of the Fisher Bill into the British House of Commons last August. After considerable discussion in Parliament and throughout the country the Bill was withdrawn to be redrafted in some of its clauses.

The Second Education Bill which has just been introduced (January 14th, 1918) is substantially of the same purport as the original. The outstanding features of this measure may be summarized as follows:

(a) It places upon the counties and the county boroughs the duty of providing for education as a whole.

(b) It abolishes exemptions from attendance at school in the case of children under 14 years of age.

(c) It restricts the industrial employment of children during elementary school age.

(d) It provides compulsory continuation schools for young persons between 14 and 18 years of age, under stated conditions.

(e) It makes the physical welfare of pupils in all schools a special concern.

(f) It gives Boards power to assist nursery schools and in other ways to help the physical and social welfare of the children (from 2 to 6 years of age) cared for in these institutions.

Substituting familiar terms for those of the Fisher Bill some of its leading provisions would read about as follows if applied to Toronto:

"In order that full benefit may be derived from the Public and High Schools it shall be the duty of the Board of Education to make adequate and suitable provision by means of Central Schools, Central or Special Classes or otherwise, for the following:

"(1) Introduction into the Public Schools, at appropriate stages, of practical instruction suitable to the ages, capacities and circumstances of the children.

"(2) Organization in the Public Schools of courses of advanced instruction for the older children, including those who stay at public school beyond the age of fourteen.

"(3) Preparation of children for further education in the various kinds of High Schools and their transference to such schools at suitable ages.

"(4) Establishment and maintenance of a sufficient number of Continuation Schools, without payment of fees, for all young persons of the city between 14 and 18 years of age (who are under an obligation to attend such schools) with a view to continuing their education and helping them to prepare for the freedom and responsibilities of adult life.

The courses include special provision for physical training.

"(5) Submission of schemes to the Department of Education to give effect to the foregoing, either on the Board's own initiative or when required by the Department.

If the Department of Education approves of any scheme submitted by the Board the latter shall thereupon give effect to the scheme.

"If the Department is of the opinion that a scheme does not make adequate provision in respect to all or any of the purposes to which the scheme relates and the Department is unable to agree with the Board as to what amendments should be made in the scheme the Department shall offer to hold a conference with the Board and, if requested by the Board, shall hold a public inquiry in the matter.

"If after such conference or public inquiry the Department disapproves the scheme it shall notify the Board and if an agreement is not reached within one month thereafter, the Department shall lay before the Legislature the report of the public inquiry together with a report stating the reasons for the Department's disapproval and any action which the Department intends to take by way of withholding or reducing any grants payable to the Board."

The clauses of the Fisher Bill referring to Continuation Schools have their parallel in the Adolescent School Attendance Act of the Province of Ontario which has been on the Statute Books for several years and which may be applied on the initiative of a school board.

The Ontario Auxiliary Classes Act is another broad and adaptable measure which parallels other important features of the Fisher Bill.

R. H. COWLEY,
Chief Inspector.

January 31st, 1918.

D. signifies Directress. A. signifies Assistant.
K.P. signifies Kindergarten—Primary.

Report of the Supt. of Supplies

SUPERINTENDENT OF SUPPLIES' ANNUAL REPORT

To the Chairman and Members of the Board of Education:

I have the honor to submit the following report in regard to Text Books and Supplies furnished by the Board of Education for the year 1917.

The following school supplies were furnished to the pupils free: Text Books, except Geographies, Geography Readers, History Readers, and Hygiene Books; these are lent the same as supplementary Readers;Work Books, Note, Exercise, Dictation, and Writing Books, Drawing and Practice Paper, cap and note size, Lead Pencils, Slates and Slate Pencils, Chalk, Pens, Penholders, Envelopes, Ink, Paints, Art, Brushes, Colored Crayons, Pastel Crayons, Crayograph, Charcoal for Art Work, Bookkeeping Blanks, Business Forms, Maps, Globes, and other School Apparatus, etc., are furnished free. There is, in addition, a large variety of books provided for supplementary reading for all grades. These are lent to the pupils to be used in school and are not to be taken home. Shorthand Note Books, Typewriting Machines, Typewriting Supplies, etc., are supplied free for use in the Commercial Classes. Shorthand Text Books, Bookkeeping Texts, are lent to pupils the same as Geographies and Supplementary Readers.

All classes in which sewing is taught are furnished with Needles, Thread (both silk and cotton), Braid, Tape, Canvas, Prints, Ginghams, Lawn, bleached and unbleached Cotton, Damask, Dress Goods, Wool, etc.

There are eighty Kindergartens in the schools, each having a large attendance; these are furnished with apparatus and other school equipment and the many supplies used in the Kindergarten work.

There are Fifteen Manual Training centres in connection with the Public Schools; these are supplied with Woodworking, Tools, Lumber, special Drawing Paper, Pencils, Hardware, Stains, Oils, Varnish, Nails, etc.

There are fourteen Household Science centres in the Public Schools where cooking is taught. These are supplied with Groceries, Meats, Vegetables, Cereals and all supplies that are used in teaching this subject. There are also two Housekeeping Centres—one at 16 Orde Street and one at Lee School—where Cooking, Sewing and General Housekeeping is taught in all its branches.

Seventeen Supervised Playground Schools were conducted during the months of July and August, and received a supply of Sand, Pails, Trowels, Scoops, Rubber Quoits, Base Balls and Bats, Basket Balls, Foot Balls, and other apparatus for the exercises and games carried on at these schools; also First Aid Medical Supplies were furnished to each centre.

One Supervised Vacation School was open during July and August, and received supplies of Wool, Needles, Raffia, Canvas, Special Paper and other sewing material. which was used by the children in making many useful articles, also First Aid Medical equipment supplied.

There were also 6 Industrial Classes conducted in connection with the Playground Centres. These were supplied with Cane, Raffria, and other equipment required in the work carried on by the instructor and pupils of these classes.

There are two open air forest schools—one in High Park, in the western part of the city; the other in Victoria Park, in the east. These schools receive the regular school supplies, and each pupil is also furnished with a camp bed, pair of blankets, pillow, and waterproof cover for bed, for protection from the rain. These schools have a fully equipped kitchen and dining room, where the pupils in attendance and staff receive meals each day. A large quantity of Milk, Bread, Groceries, Meats, Vegetables, Fruit, Ice, Fuel, etc., is supplied to these schools. The attendance numbers about 100 at each school. These schools are in charge of a male Principal ,with two teachers and a nurse to assist, also two cooks are employed.

Nine Public Night Schools were opened for six months during the year, viz., October to March inclusive. All of these schools received Text Books and school supplies of various kinds necessary for carrying on their work.

In addition to the above, the Central Technical School have night classes five nights furing the week, and has also four Branch Night Schools—one in the eastern (at Riverdale Collegiate), one in the northern (at Oakwood Collegiate), and one in the western part of the city (Humberside Collegiate and Annette), and King Edward Annex. The High School of Commerce also has three Branch Night Schools—one in the eatern (in Queen Alexandra), one in the northern (in North Toronto High School), and one in the western part of the city (Annette Street School). These Night Schools receive the necessary supplies required. Night Schools were also held in Jarvis and Harbord Street Collegiates, and North Toronto High School.

The Central Technical School, which teaches a variety of subjects, requires an ever-increasing and varied quantity of supplies for teaching Art, Science, Physics, Household Art. Mechanical and Industrial Instruction is given and material is supplied for these, including machinery, tools and other equipment.

The High School of Commerce, Collegiate Institutes and High Schools receive general School Supplies. Art Supplies, and a large quantity of Apparatus and Chemicals for Science work.

Caretakers of all schools receive large quantities of Floor Oil and other material for cleaning, also Tools, Hard, ware, Lawn Mowers, Hose, Wheel Barrows, and many other supplies.

As the schools are increasing in size and number, it is very necessary that each school should have a separate room in which to keep supplies. This room should be of sufficient size to hold supplies required for three or six months, if necessary. If greater quantities could be delivered to the schools it would mean fewer deliveries. This room should be on the ground floor, or in the basement.

In addition to the above, the following are supplied and under control of this department: Flags, Fire extinguishers, Pianos, Office Supplies, Printing, Window Shade, Gymnasium Apparatus, Express Work, Gas, Water, Electric Light and Power, Telephones, etc., 18,362 Flowering Plants, 789 Shrubs, and a large quantity of Grass Seed, Black Loam, Manure and other Fertilizer were supplied to the

schools. Several of the schools did not receive plants owing to building operations going on and their grounds not being ready.

This Department made and delivered to the schools during the year 2,760 gallons of ink at an estimated cost of 25c. per gallon.

All accounts for supplies under the control of this department are checked and duplicates certified in this office for the Advisory Industrial, Advisory Commercial, and the. Management Committees of the Board.

FUEL—The supplying of fuel for such a large number of buildings is becoming a greater problem each year, not only in regard to the cost, but also in the quantity used. In many of our schools night classes are conducted and meetings of various kinds are held at night and Saturdays, These schools are required to be heated until ten o'clock, and in some cases much later. Gas, electric light and power for ventilation purposes are supplied, and the water has to be kept running continuously in the wash rooms until the buildings are closed. The automatic self-acting flush tanks use a large quantity of water, therefore the cost for water, fuel and electricity is very large. Many of the schools require from 150 to 300 tons of coal, as well as a large quantity of wood and charcoal required for lighting the fires. As the storing capacity for fuel in the basements is limited to only a part of what is required for the year, I think it would be well for the Property Committee to consider the advisability of constructing fuel areas of sufficient size to hold the year's fuel. These should be underground immediately outside of the school buildings and of easy access to the boiler rooms. These coal pockets could be extended any distance desired and would not curtail a foot from the playgrounds. They should have several openings on the top outside so that coal may be delivered at any time without dust being carried through the building. Where coal has to be delivered through the school yard there should be a drive way from the street to the coal chute, constructed of reinforced planking, brick or concrete. This need only be a strip wide enough for a waggon or truck to use. The ordinary planking will carry only single horse loads without breaking. When a contractor is limited to single loads it adds to the cost for

delivery, whereas if he can deliver by motor truck or team loads it takes less time and reduces the cost, beside eliminating the breaking of plank in the yard.

These coal pockets would be no cost to the Board beyond that of construction, as they would be on the property belonging to the Board. If the heating plants in the schools were constructed so that they would burn screenings, a large saving could be effected in the cost of coal.

The Board this year experimented in the cost of heating two schools of a similar size and about equal conditions with oil as a fuel as against coal, but from the results obtained, although the price for oil was considered low, the difference in cost was so much in favor of coal that I could not recommend any change in favor of oil at the present time. The following report was made to the Management Committee and Board in reference to the heating of the two schools named (see report, to follow):

The following is a comparative statement of the fuel burned in Annette Street School, a 23-room building ,for the eight months' season of the year 1917, as compared with the fuel oil used in Earl Grey School, also a 23-room building, for the same length of time.

The total amount of coal for Annette Street School is 240 tons, costing $1,669.37 (this includes $14\frac{1}{2}$ cords of wood). Average amount per month, 30 tons; avearge cost, $208.70.

For the same length of time 30,702 gallons of fuel oil was used in Earl Grey School, costing $2,289.14. Average amount per month, $4,087\frac{3}{4}$ gallons; average cost per month, $286.14. To the total for the eight months should be added $25 for electricity used to drive motors for fans, making a grand total of $2,314.14.

The difference between the total cost of fuel oil and coal is $644.77.

Annette Street School had night school classes three nights per week for the six months' term. October to March 31st, and, in addition, a large number of ratepayers' and other meetings were held during the year, while Earl Grey had no night classes and very few, if any, other meetings were held at that school.

There are many schools that use far more coal than seems necessary, and I believe it would pay the Board of Education to get a report from an expert engineer on heating, as to whether the best results are being obtained from the present heating plants in the schools.

The same applies to the electrical motors in use in the schools for power purposes, and for which is paid a very large amount in fixed charges. A report should be had from an electrical engineer as to whether the best results are being obtained from the motors that are at present in use in the schools and whether a saving can be made in this regard.

The cost of Text Books and other supplies purchased during the year was as follows:

PUBLIC SCHOOLS

Text Books, $8,434.32; School Supplies, $16,067.04; Blank Books, $21,864.45; Supplementary Readers, $2,846.82; Kindergarten Supplies, $5,326.29; Drawing Material, $2,479.85; Manual Training Supplies, $2,209.59; Domestic Science Supplies, $4,246.32; Commercial Supplies, Typewriters, etc., $1,878.40; Medical Inspection and Dental Supplies, $3,170.53; Wall Maps, Globes and Apparatus, $1,156.91; Sundry and Office Supplies, $6,139.85; Caretaker's Supplies, Hardware, etc., $4,707.26. Amount received from sale of books, old paper, etc., $3,446.86. Estimated value of stock on hand in storeroom at end of the year, $60,439.23.

FREE TEXT BOOKS

The total cost of Free Text Books issued in 1917 was $8,434.32. Of this amount, $278.80 was returned for the text books sold, leaving a balance of $8,155.52 as the cost of Free Text Books during the year. In nearly every school the books have been preserved with great care.

The total cost of supplies, including work books, exercise books, book-keeping blanks, note books, dictation books, business forms, drawing materials, writing books, slates and rulers was $42,322.07. $1,459.65 was received for supplies sold during the year, leaving the net cost of supplies $40,862.42.

The cost per pupil for text books on the basis of total entollment, omitting Kindergarten pupils, was 13 cents.

The cost per pupil for text books on the basis of average monthly attendance, omitting Kindergarten pupils, was 15 cents.

The reason the cost of text books is so low, there was a large stock carried over from the previous year, also the price being fixed by the Provincial Government they did not advance in cost, like other school supplies, which almost doubled and more in some cases.

The cost per pupil for supplies on the basis of total enrollment, omitting Kindergarten pupils, was 61 cents.

The cost per pupil for supplies on the basis of average monthly attendance, omitting Kindergarten pupils, was 73 cents.

The cost per pupil for both text books and supplies on the basis of average monthly attendance, omitting Kindergarten pupils, was 87 cents.

The cost per pupil for text books, supplies and kindergarten material on the basis of total enrollment was 72 cents.

In the above statement the text books and supplies for Night Schools are charged against the day school pupils.

COLLEGIATES

Library and Maps, $977.87; School Supplies, $1,040.71; Office and Sundry Supplies, $944.32; Commencement, $204.75; Art Models and Decorations, $557.90; Printing, $245.76; Gymnasium Apparatus, $173.93; Caretakers' Supplies, Hardware, etc., $274.22; Science and Laboratory Supplies, $1,722.57; Domestic Science, $397.97; Cadet Uniforms, etc., $94.50.

HIGH SCHOOL OF COMMERCE

Library and Maps, etc., $264.19; School Supplies, $202.62; Science and Laboratory Supplies, $405.92; Business Technique, Typewriters, etc., $576.92; Office and Sundry Supplies, $78.90; Printing, $450.45; Commencement, $37.40.

TECHNICAL HIGH SCHOOL

Architecture, Machine Drawing and Design, $1,109.23; Mathematics, $2.10; Physics, $363.20; Chemistry, $778.01; Shop Work, $6,564.32; Supplies Engineering Department, $1,211.28; Caretakers' Supplies, Hardware, etc., $1,099.31; Library and Maps, $455.61; Domestic Art and Household

Science, $4,434.19; School Supplies, $1,279.50; Office and Sundry Supplies, $229.74; Printing, $1,250.20; Commencement, $75.95; Cadet Uniforms, $1,390.00.

Appended will be found tables showing quantities of some of the supplies furnished to the schools this year, also the quantity of fuel supplied, showing the cost per school and per room.

I desire to call the attention of the members of the Board to the urgent need of enlarging the supply building, so that there will be better facilities for storing and distributing supplies to the schools. With the present limited accommodation this department is greatly handicapped. In the shipping department there is a very large increase each year in the quantity of supplies furnished the schools.

eIncludes Fuel for Gymnasiums, Assembly Rooms, Halls, Basements, Night Classes, etc.

*Includes Fuel for Night Schools.

zNo Flue Heaters used.

xHeating New Additions to Building during completion.

The cost of fuel as shown in these tables is based on the following prices:

Hard Coal (grate, egg, stove or nut) per ton...	$6.45
Soft Coal (Pokohontas lump) per ton.....	$6.25—6.95
Hardwood, per cord.....	9.50—9.75
Slabs, 4 foot, per cord.....	6.00
Slabs, 2 foot, per cord.....	6.50

Respectfully submitted,

WILLIAM KERR,
Supt. of Supplies.

Supt. of Buildings' Annual Report

SUPERINTENDENT OF BUILDINGS' ANNUAL REPORT

To the Chairman and Members of
The Board of Education:

In compliance with Clause 2, Section 78, By-Laws and Regulations of the Board, I have the honor of herewith respectfully submitting my fourteenth Annual Report.

C. H. BISHOP,
Supt. of Buildings.

STATISTICS

The following condensed extracts from statistics will give information not to be found elsewhere except at considerable labor of searching through the different schedules.

For greater convenience in looking up details of information contained in the Schedules appended, reference may be had to the Index at the end of this Report.

SCHOOL ACCOMMODATION

Secretary - Treasurer's Financial Statements

ANNUAL REPORT
OF THE
BOARD OF EDUCATION
OF TORONTO

Year ending 31st December, 1917

Your Board has pleasure in submitting herewith the Annual Report for the year 1917, accompanied by the Revenue Account, the Balance Sheet and the Surplus Account. The Accounts have been audited by the City Auditor, Mr. Walter Sterling, whose certificate appears thereon.

During the year just ended our best efforts were employed to carry out the instructions of the City Auditor, as per the resolution of the Board dated October 16th, 1916, regarding a complete and proper system of Revenue and Expenditure Accounts, and it is most gratifying to state that the Board now has one of the best systems of accounting.

The different Executives are to be congratulated for the efficient way they "carried on" during the year, in spite of the unusual times our Country and Empire are passing through. Mention might also be made of the staff of the various departments. The different Educational branches have also borne their portion of the burden and Principals and Teachers alike must share in this respect.

Our land and buildings representing a value of nearly $1 ,000,000.00 are being maintained efficiently and economically and to our Superintendent of Buildings and his staff, this Board feels its indebtedness.

Respectfully submitted,

MILES VOKES,

Chairman.
